About our Cloud-based Internet Business Platforms

1999 just called and asked for their hosting servers back!

It's 2021 and hosting is no longer enough to accommodate the needs of today's online internet business. Running Internet Shows, Providing Classroom settings, even just including all important multimedia in your business website; it's all best backed by a solid platform.

COOLCOM Digital Media is a Tier One Canadian **Web Business Platform** provider with advanced technology located in Toronto and connected to TorIX (Toronto Internet Exchange) Our Cloud **Internet Business Platforms** utilize a multi-layer security model residing on a fully redundant server farm and infrastructure with auto-healing options and our cloud Accelerator automatically optimizes web applications and web server content running on VPS and automatically publishing them to our global CDN.

We utilize distributed SAN based on SSD drives and Enterprise class servers, the latest most powerful Intel® processors, and reliable Tier-1 Bandwidth to offer you the best in business platform provision.

Add to that our own 21 year strong and constantly evolving security strategy that defends your Internet Business from the dangers of the internet that threaten continuity for businesses that conduct day to day routines without evolved security.

- Enterprise quality hardware and SSD storage
- Connected to Toronto Internet Exchange (TorIX)
- Canadian and International placement options
- Advanced responsiveness of order process in Mobiles and Tablets

2 Kinds of backup going on at all times

Not only do all clients have access to their own downloadable backups, but our **Internet Business Platforms** are performing background backups every day and storing the data remotely in order to ensure there is a solution at hand for any issues that arise.
